Education

Delhi Technological University New Delhi, India	2025 – Present
Bachelor of Technology Computer Science Engineering	CGPA: 9.3/10
SHDPS Delhi	2023- 2025
CBSE- XII	Class X: 96.8%
Salwan Public School Gurugram	Till 2023
CBSE-X	Class XII: 97.8%

Technical Skills

Languages: Python, C, C++

Core CS: Data Structures & Algorithms

Web Technologies: HTML, CSS

AI/ML: TensorFlow, PyTorch, Scikit-Learn, Pandas, NumPy, RAG Pipelines, Agent Design, Embedding Models, Vector Search

Tools: Git, GitHub, VS Code, Hugo, Canva, Streamlit

Work Experience

Research Intern

- Delhi Technological University, New Delhi, India June 2026 - Present
- Conducting research on agentic systems in Generative AI with a focus on agent architectures, memory systems, planning, and multi-agent workflows
 - Contributing to literature surveys and identifying open research gaps in secure agent design and evaluation

Machine Learning Team Member

- AI & ML Society (AIMS), DTU, New Delhi, India Feb 2026 - Present
- Recruited into the core ML division following a Rank 4 finish in a campus-wide competitive ML competition.
 - Engineered and benchmarked 5+ deep Autoencoder architectures (ANN, CNN, U-Net) for image compression, optimizing latent bottlenecks to balance reconstruction fidelity and generative capabilities.

Industry Projects

AASHA: Offline Rural Health Assistant (for AIC-CureBay Hackathon at APOGEE 2026, BITS Pilani)

[GitHub](#)

- Engineered a fully edge-native AI healthcare assistant for ASHA workers, enabling reliable medical triage and patient screening in zero-connectivity rural environments without cloud dependency
- Developed an offline multilingual LLM pipeline with quantized on-device inference, supporting voice-first interaction in English and Devanagari Hindi for real-time patient assessment and cognitive screening
- Built an OCR + LLM pipeline for digitizing handwritten prescriptions and structuring medical records
- Implemented multimodal diagnostics using audio and computer vision models for respiratory distress detection, skin condition analysis, and anaemia screening

Marie Curie Digital Twin

[GitHub](#)

- Developed a RAG-powered conversational agent simulating Marie Curie's personality, knowledge, and life experiences using LangChain, ChromaDB, and Gemini
- Implemented long-term memory and timeline-aware personas to maintain conversational continuity and historical accuracy
- Built a semantic retrieval pipeline using vector embeddings to improve factual grounding and reduce hallucinated responses

SignSync: AI-Powered Indian Sign Language Learning Platform

[GitHub](#)

- Developed a gamified AI-driven platform for learning Indian Sign Language (ISL), combining real-time computer vision and interactive progression systems to make sign language education more engaging and accessible
- Engineered a live gesture recognition pipeline using hand landmark detection and frame-by-frame motion analysis to evaluate user signs through webcam input and deliver instant accuracy feedback
- Integrated machine learning-based sign validation with a responsive gamified frontend featuring streaks, leaderboards, levels, and reward mechanics to encourage consistent practice and user retention

Achievements and Awards

- 3rd Place, Advanced Debugging (Invictus, DTU):** Identified and resolved complex logical, syntax, and runtime errors across multiple programming languages in a high-intensity competition
- Rank 4, Campus Wide Kaggle ML Competition:** Achieved robust model generalization with minimal leaderboard variance, demonstrating strong resistance to overfitting and reliable performance on unseen test data

Positions of Responsibility

- Member, AIMS** (Artificial Intelligence & Machine Learning Society, DTU) Feb 2026 – Present
- Member, IEEE** September 2025 – Present
 - Managed corporate relations and sponsorships for INVICTUS'26 (DTU's Annual Tech fest)
 - Assisted in event planning and execution, ensuring smooth operations and team coordination
- Member, Sahitya Debwing** (Literary and Debating society of DTU) September 2025 – Present
 - Among Top 5 speakers at IIT Kanpur's Debating Competition, 2025

Certifications

- **Coursera DL Specialization** by Andrew Ng
- **Coursera ML Specialization** by Andrew Ng
- **Kaggle Intro to ML:** EDA, Underfitting & Overfitting, Random Forests
